for the senses

TYLÖ SAUNA
EVOLVE

Tylö sauna Evolve

A sauna room made for you.

Sauna bathing should be relaxing and pleasant, not a chore. Step into a familiar room and let the heat and the natural scent of the wood welcome you. Sauna bathing is about sitting in a warm room where you can relax and recharge. No fiddling, no knickknacks, just sauna bathing.

Evolve is for people who prefer the best of traditional sauna bathing. The fittings are made of aspen with spruce panelling and come in 17 different sizes and shapes to give you as many options as possible when buying a new sauna.

Add your own personal touch by choosing from our collection of glazed sections, doors and accessories. The choice is yours; it's your sauna room.

The fastest route to relaxing sauna bathing.

Evolve is Tylö's new traditional sauna room collection. Delivered in prefabricated modules, it's the easiest, quickest way to realise your sauna dream. You need neither expert assistance nor a big toolbox – you don't even need a lot of time. Everything can be assembled from the inside, which means you don't need any extra space for assembly purposes.

Aesthetics and function in one.

The classically designed room has spruce panelling and aspen fittings, as well as a host of exciting solutions. For instance, you can choose between two different heights depending on which floor frame you select, 2100 mm (standard) or 2010 mm. There's no need to crowd. The aluminium floor frame has a practical function since it prevents humidity from accumulating on the walls and is easier to clean, and an aesthetic function that reflects its Scandinavian heritage. The aluminium floor frame can also be painted or tiled in order to match the rest of the bathroom interior

Evolve sauna room comes with a low doorstep measuring a mere 8 mm. A higher doorstep for better sealing is however available as an extra accessory. The sturdy glass door is 8 mm thick.

The Evolve sauna room includes:

Thermally-insulated wall and ceiling sections clad in spruce panelling • Clear glass (standard) sauna door (DGB) with wood frame • Blonde aspen fittings • Aluminium floor frame • Vent and assembly hardware.

A sauna room with a new look.

Tylö is taking yet another step in design. The panelling is straighter, the corner mouldings are gone and the ceiling mouldings are considerably smaller. This new design is particularly evident and neat because of the so-called "hidden nailing" that conceal nail heads in the panelling, both outside and inside the sauna room. The panelling merges with the ceiling on the inside to form a straight line from the wall thanks to the new assembly alternative. Evolve has two aspen benches and backrests, and the benches have a brand-new design with slender vertical strips.

Choose a heater that suits you.

You can choose freely among Tylö's home sauna heaters for your Evolve sauna room. We offer everything from our functional Sport heater for traditional saunas to our most advanced Combi heater for a fully-fledged steam sauna solution. Regardless of which model you pick, each heater has every one of the advantages that have made Tylö a synonym for quality among sauna enthusiasts the world over.

Your freedom of choice is part of our design plans.

This is an image of our complete, prefabricated Evolve sauna room as seen from above. You can see the dimensions and how the fittings are designed. All our sauna rooms can also be installed mirror fashion. Wall sections which can be replaced by glazed sections are marked in grey. The external height of all rooms measures 2100 mm.
